Narrative: The Alaska Type 2 Green Team transitioned into place on the fire 6/17. The weather is on a warming trend which potentially will increase fire activity where heat sources exist. Crews are working along the western flank toward Washington creek. Work has been completed in Divs B, U and T and the last of the equipment is being hauled out. Fire suppression repair work is being evaluated on parts of the fire with actual rehab work taking place on the East flank dozer line down to Washington Creek. Crews on the west flank will continue to build and secure line from H-20 north toward Washington Creek. Three crews at H-30 will continue building direct line up toward H-20 and down to the river. Crews will continue rehab on the cat line down to Washington Creek. Mop-up will continue on the east flank. If conditions allow, a burnout operation is being planned in DIV. R. Five lower 48 state Type 1 crews will be released from the fire 6/18.

Narrative: The transition to the Type 3 organization was completed. Several overhead personnel and six crews were demobilized. Four boats were scheduled for release at the end of the shift. Gridding and mop-up continued with crews in division Z from H-95 to H-93. The Delta crew gridded in Division H for a 150 feet in from H-50 to H-34. Another helicopter was released. The remaining three helicopters worked shuttling personnel for work on the line, demob, and transporting supplies to those still working the incident. Fire behavior was minimal with some smoldering in the interior. Higher relative humidities and some precipitation due to thunderstorms aided the minimal fire behavior. It is expected that actions along the southern perimeter will be completed within 2 to 4 days.
